

TECHNICAL DATA SHEET

TIMPEST AQUA ANTI-WOODWORM

Technical features

Description: TIMPEST AQUA anti-woodworm is a ready-to-use, water-based product, whose low harmfulness shows that it is ideal for treatments of any type of application in internal and external environments. The product deeply penetrates into the wood fibers and carries out its anti-woodworm action. In addition, it has a preventive action against termites.

Formulation:	Liquid micro emulsion
Type:	Water based
Active ingredient content:	For use as a preservative and curative: 2.5 g/L permethrin
Binder content:	None
Appearance:	Colorless liquid
Smell:	Light
Density:	1.010 g/mL approx.
Flash point:	Not flammable
pH:	7.0 approx.
Stability:	24 months

Application features

Dilution:	None – Ready to use
Technique:	Brush, low pressure spray and injection
Coverage:	For use as a preservative only: 100-200 mL/m ² For use as a preservative and curative: 200-300 mL/m ²

Instructions for use

Pre-application:	The wood should be clean and free from wood dust and other contaminants
Application:	Apply by brush, low pressure spray and injection

- Drying:** The product is dry to the touch in 1 hour depending on the wood and on the environmental conditions. Treated surfaces should not be reprocessed for 24 hours. Unprotected people and animals should be kept away from treated areas for 48 hours or until dry
- Cleaning:** Remove most of the product from the brush with a cotton cloth and wash the brush with soap and water
- Disposal:** In accordance with local/regional/national regulations
- Storage:** Protect from frost and store below 40 °C. Store in a safe place away from food or foods
